+ [Sara Rouane | LinkedIn](#)

+ PERSONAL PROFILE

Artificial Intelligence student with a creative technology background combining software engineering, machine learning, and professional 3D modeling experience. Strong analytical thinker with hands-on exposure to ML model development using PyTorch and TensorFlow. Passionate about applying AI to visual and creative production workflows.

+ SUMMARY OF QUALIFICATIONS

- Currently pursuing Software Engineering Technology with focus on Artificial Intelligence
- Practice with machine learning model development using Python, PyTorch, and TensorFlow
- Foundational knowledge of C++ and software development principles
- Experience working with 3D modeling tools (AutoCAD, SketchUp) and Adobe Creative Cloud
- Strong analytical, problem-solving, and interdisciplinary thinking skills

+ EDUCATION

Software Engineering and AI technology

Centennial College, Toronto, Ontario, Canada.

September 2024 – Present

Coursework includes AI Systems Design, machine learning model development, and software architecture. Developed and evaluated ML prototypes using Python-based frameworks.

Relevant Courses Completed:

- AI Systems Design
- Machine Learning Fundamentals
- Data Structures & Algorithms
- Object-Oriented Programming

Key Achievements:

- Developed machine learning prototypes using PyTorch and TensorFlow in academic projects
- Applied analytical techniques to design and evaluate predictive models

AEC Interior Design

Teccart, Montreal, Quebec, Canada.

2013 – 2015

Developed strong spatial reasoning and 3D modeling capabilities through applied design and rendering projects.

+ WORK HISTORY

Interior Designer

JPH Design, Montreal, Quebec, Canada.

February 2023 – Present

- Developed 2D and 3D design plans using AutoCAD and SketchUp
- Created visual presentations and production-ready documentation
- Applied structured workflows to manage multiple design iterations

Interior Designer

Brigil Construction, Gatineau, Quebec, Canada.

May 2021 – August 2022

- Produced technical drawings and renders for residential projects
- Collaborated with multidisciplinary teams to refine visual outputs

+ TECHNICAL SKILLS SUMMARY

Programming Languages: Python, C++, JavaScript, C#

Machine Learning & AI: PyTorch (course exposure), TensorFlow (course exposure), ML model prototyping, predictive modeling fundamentals

3D & Creative Tools: AutoCAD, SketchUp, Adobe Creative Cloud (Photoshop)

Other: Analytical problem solving, software design principles, technical troubleshooting

+ PROFESSIONAL AFFILIATIONS

- Student Member, Engineering Technology & Applied Science Program – Centennial College
- Active participant in AI and technology communities through coursework and independent research

+ PERSONAL INTERESTS / VOLUNTEER WORK

- Exploring the intersection of artificial intelligence and creative technologies
- 3D modeling and visual experimentation using design tools
- Researching advancements in machine learning and computer vision
- Digital design and visual storytelling
- Independent exploration of emerging AI tools and frameworks
- Continuous learning in deep learning and model experimentation
